

UNIVERSITY HAS MANY EL PASOANS

Big Texas Institution This Year Has Two More From El Paso than Last Year.

Austin, Tex., Feb. 22.—Registration for this session in the University of Texas reveals 111 El Paso county students represented by the following students: Mary Elizabeth Andrews, Florence Bell, John Quincy Burch, Luckey Cochran, Hugh Caldwell, Rupert Warren, Gilbert, Kathleen, Lavinia, John, James, John Gorman, Annie Laura Harper, William Walker Hawkins, Ross Dunkin, Bill, Harry, Louis, Jones, Carley, D. Kennedy, Joseph, Louis, Lambert, Stephen, Olden, Lattner, William, Emory, Loebe, Francis, Joseph, Lyons, Antonio, Matlin, Gertrude, Mead, Elsie, Roy, Means, Christine, Lorena, Moelrich, Norman, J. Morrison, David, Emmet, Mulachy, Louis, Wellington, Roberts, Allen, Lee, Shirley, Rose, Stolaroff, Newton, Franklin, Tidwell, Joe, Boone, Worham, Clark, Wright.

According to the records this is an increase of two compared with the last session. The severity of the matriculation requirements have been steadily increased from year to year until at the present time the acceptance of a student into freshman standing means that the preparatory school from which he has been sent is doing its work well.

Despite the hard conditions in the state incident to the low price of cotton, the institution is now having one of its most successful years. This year 229 students are receiving instruction within its doors, a larger attendance than that of any other university in the south. It is interesting to note that 452 students of last session's matriculation were sons or daughters of farmers or stockmen.

Above 100 students are wholly or in part self supporting, or nearly so; percent of the entire student body is not only a measure, self supporting, but self educating.

AUTO THIEVES STEAL THREE CARS AND ABANDON THEM

Three automobiles were stolen Saturday night and Sunday night, driven by the thieves and then abandoned. F. G. Billings' Buickmobile was taken from the Boulevard front of the First Presbyterian church, Sunday, evening and was found by the police at the corner of Campbell and Franklin street.

W. L. Amosette's Buick roadster was taken from in front of his home on West Missouri street Saturday night and was found Sunday near the foundry, where it had been left in the mud.

Harry C. Tier's Ford auto was taken from in front of his home, at 1805 Ohio avenue, and was found in an arroyo near Fort Bliss.

MAYOR-ELECT LEA TO MAKE FIRST TALK TO ADCLUB

Tom Lea will be the guest of honor at the Adclub luncheon-meeting Wednesday at Hotel Sheldon. The mayor-elect has been invited by the club to make a talk before the members on the future of El Paso and he has accepted. In addition to the new city executive, the Waco delegation, which secured the next state convention of Adclubs, will make a report and tell something of the trip to the Texas convention. The "On to Chicago" trip will also be discussed.

PATROLMAN FINLEY IS HELD TO GRAND JURY

The taking of testimony in the case of policeman J. Finley, charged with the murder of David Jones, the negro who shot and killed policeman Gus Chatterton on the night of Feb. 11, was finished Saturday afternoon in justice J. J. Murphy's court.

Officer Finley was bound over to the grand jury under \$1000 bond, which was given by J. M. Lunkford and E. Wright.

EFFICIENCY IS URGED BY EXPERT

Irrigation Supervisor Gives Business Talk to Ranchers Saturday.

Better business methods for farmers was the keynote of an interesting address by I. D. O'Donnell, supervisor of irrigation at the Saturday afternoon session of the reclamation service conference at the chamber of commerce. Mr. O'Donnell showed how many farmers are unable to tell whether certain crops are money-making, simply because they do not keep close track of the output and the cost of their farms. As a result, many are growing great quantities of produce on which they are losing money and merely counterbalancing this loss by other crops on which there is a good profit.

Mr. O'Donnell cited his example from his own place, "Ruster Farm," 400 acres of irrigated lands in Montana. He began by stating that the place of all places for plans is the farm, more particularly the diversified, irrigated farm. "Plans should be made from three to seven years ahead and a proper system of rotation of crops worked out," he declared. The irrigated farm is more expensive in the way of upkeep, consequently the finer the plans should be made and the closer the system of farm book-keeping be, he added.

Rotation of Crops. Taking up the rotation of crops, he suggested alfalfa as a first crop, then grain and finally to other products. Once in every four years, however, the ground should be left worked over and suggested either sugar beets or sugar corn as a good crop for this purpose. Potatoes also result in giving the ground a good and much-needed turning over.

Thorough cultivation of all irrigated land was strongly urged. Often two or three plowings are not too much, he said. The matter of stock feeding also came in for some attention and Mr. O'Donnell stated that no farm, no matter how small, should be without its stock. On his own place he goes in for fattening sheep in the fall and the season for fall pasture in Montana is much shorter than in Texas and New Mexico. Still he was able to show a profit, last fall, of over \$4000 for 72 days feeding on his 400 acres. And this was after getting off all his regular crops.

Feed Hay When Prices Low. Replying to questions, he did not believe that it would be a paying proposition for farmers to take up stock-feeding when they can get \$12 per ton, net, for alfalfa, but where alfalfa sells for from \$5 to \$8 a ton, it would pay and pay well.

Prior to his address on the irrigated farm, Mr. O'Donnell gave an address on rural credits. He cited the systems of farm credits in Germany and France, where loans are made through community banks at about 2 1/2 per cent. However he did not believe such a system would quite be practicable in this country.

He did suggest, however, that it might be advisable to form farmers' loan associations with a capitalization of, say, \$50,000, which would loan money for purchasing dairy cattle or thoroughbred stock and discount these notes with the large financial institutions of the east. This loan would, of course, be of a commercial nature and not run over six months.

Mr. O'Donnell explained certain legislation now before congress with regard to farm loans. The legislation proposes to sanction the formation of associations for real estate loans. These associations would have a capital of not less than \$10,000. Of this, \$1,000 must go to the national reserve bank for the district. The other \$9,000 may be loaned at 5 per cent up to not more than 50 per cent of the selling value of the real estate. The mortgages can then be taken to the reserve banks.

HANDLING SHELLS FOR RUSSIAN GUNS

Close contact with danger renders one callous to consequences, and the photograph shows Russian artillerymen unloading shells from the caisson for use in a light field gun. The Russian caissons are made to let down and form a cupboard from which the shells may be easily drawn. The commander of the battery is at the right, observing the effects of his fire.

USING HORSES AS PROTECTION HOLES

American Indians used to make their mustangs lie down in front of them and shoot from behind that protection in their frontier battles with the whites. Now the Cossacks of Siberia are using the same tactics against the Germans, in the plains of Poland and east Prussia. The photograph shows a Cossack trooper, his horse lying down to shield him, firing on a German outpost party. Even though wounded, the animals are trained not to rise. This protection is doubly valuable in winter when the ground is too hard to permit troops to trench with the bayonet.

which will discount them and the \$3,000 be available for other loans. In turn, the reserve banks would issue mortgage loans against the real estate mortgages which they hold, issuing these at 4 per cent and making their profit of one per cent on the deal. The restrictions, however, would be rather too severe for farmers on government projects and he looked for very few of such loans to be placed in this part of the country, he said.

Save River Pans. In the Salt River district, a proposal has been made to start a loan association by levying \$1 on each of the 15,000 acres in the project. This would give a nucleus for a substantial association. It was announced that Felix Martinez and associates were working on a proposition to loan \$250,000 to farmers at six per cent to buy thoroughbred stock and to buy machinery. The proposition is not yet in definite shape, but it is hoped to be able to start loaning the money in a few weeks.

There was a short discussion on the methods of ridding the soil of alkali and various methods were proposed. Among the suggestions were the growing of sugar-beet, sugar-beet, sub-drainage and driving it down by fertilizing.

EXPOSITION BREAKS RECORD FOR FIRST DAY ADMISSIONS

San Francisco, Calif., Feb. 22.—The Panama-Pacific exposition on its opening day, Saturday, broke all previous records for numbers of people admitted. At 10 o'clock in the afternoon the turnstiles and ticket offices were open and it was expected that night would bring the total above 300,000. The highest previous record was made at the St. Louis exposition in 1904, when on the opening day there were 157,793 admissions.

ELEVEN CHICAGO ELECTION OFFICIALS ARE INDICTED

Chicago, Ill., Feb. 22.—Eleven judges and clerks of election, both Republicans and Democrats, were indicted by the grand jury Saturday on charges of conspiracy to violate the election laws and perjury. The indictments followed evidence presented by state's attorney Hoyne, who has been investigating alleged frauds in connection with the registration for the coming municipal primaries.

COUNTY COMMISSIONERS APPROVE BARBER'S BOND.

At a special meeting of the county commissioners' court Saturday afternoon the bond of William Harrell, hide and animal hunter, was fixed at \$3000 and then approved when made. It was ordered that the balance of the \$400 appropriated for the Altura Park road be expended. The resignation of Joaquin Apodaca as constable at Glint was accepted and Sam Carr was appointed in his place. It was ordered that C. M. McKinney, purchasing agent, be instructed to obtain a list of the property at the county hospital.

MINERS FIGHT DEPUTIES TRY TO RELEASE PRISONERS

Fairmont, W. Va., Feb. 22.—In an attempt to release two prisoners, striking miners Saturday attacked sheriff C. D. Conway and a party of deputy sheriffs. Five were seriously injured and many suffered cuts and bruises. The miners drove the sheriff's party into a store, but fled when a party of 25 special deputies arrived by trolley from Fairmont. Sheriff Conway is among the seriously wounded. The fighting occurred at Farmington, which is near Fairmont.

SURGEONS MAY AMPUTATE MME. BERNHARDT'S LEG

Bordeaux, France, Feb. 22.—The surgeons at the hospital of St. Augustin of Arcachon will probably amputate the right leg of Sarah Bernhardt today.

COUNTY FORD STOLEN

The Ford car recently purchased by El Paso county for use of D. M. White, road superintendent, was stolen from in front of the Grandif hotel Saturday afternoon. Saturday night the machine was recovered, having been taken by two boys, according to the police.

25 BELTS STOLEN

Nineteen dozen men's belts contained in a shipping case, which had just been unloaded from a truck, were stolen from in front of the store of El Paso Co., 205 North Oregon street Saturday afternoon.

Athy cloth-lined weather strip keeps out the cold. Rathbun-Mix Co.—Adv.

Glimpses of the New--at The "Popular"

Blouses \$4.95

THE constant arrival of the New Blouses has brought much to interest the women who enjoy the first peep at the early spring styles. Tomorrow for your viewing and choosing there are dainty crepe de chine, pussy willow taffeta, Georgette crepe and lace Blouses. We are showing these in light pink, Copenhagen blue, tan, putty and sand as well as in plain white. Both convertible and panel collar—some with ties in the military effect. Splendid values at.....\$4.95

Other New Blouses \$2.95

You will be delighted with these. There are stripes in black and white, lavender and white, blue and white and pink and white. Blouses of China silk and crepe de chine. You will also find in crepe de chine plain patterns in white, black, sand, putty, golden brown and yellow. These are also made with the favored convertible collar—priced at

UGH! CALOMEL IS HORRIBLE! IT SHOCKS YOUR LIVER, IF BILIOUS

Calomel sickens! Don't lose a day's work! Clean your Liver and Bowels with "Dodson's Liver Tone."

Ugh! Calomel makes you sick. It's horrible! Take a dose of the dangerous drug tonight and tomorrow you may lose a day's work. Calomel is mercury or quicksilver which causes necrosis of the bones. Calomel, when it comes into contact with your bile crumbles into its breaking up. This is when you feel that awful nausea and cramping. If you are sluggish and "all knocked out," if your liver is torpid and bowels constipated or you have headache, dizziness, coated tongue, if breath is bad or stomach sour, just try a spoonful of harmless Dodson's Liver Tone tonight. Here's my guarantee—Go to any drug store and get a 50 cent bottle of Dodson's Liver Tone. Take a spoon-

ful and if it doesn't straighten you right up and make you feel fine and vigorous I want you to go back to the store and get your money. Dodson's Liver Tone is destroying the sale of calomel because it is real liver medicine; entirely vegetable, therefore it can not sicken or make you sick. I guarantee that one spoonful of Dodson's Liver Tone will put your sluggish liver to work and clean your bowels of that sour bile and constipated waste which is clogging your system and making you feel miserable. I guarantee that a bottle of Dodson's Liver Tone will keep your entire family feeling fine for months. Give it to your children. It is harmless; coats the tongue and gives it a pleasant taste.—Advertisement.

A New Method of Baking Cakes

Mrs. Nevada Briggs, the baking expert, says:

"There is just one way to make your cakes rise high and evenly—give them time to rise before a crust is formed and the batter is stiffened by cooking."

"If using a gas, gasoline or oil stove, light your oven when you put the cake in and keep the flame low until the cake has doubled in bulk; then increase the heat until it is evenly browned and will respond to the pressure of the finger. If using a coal or wood range, leave the oven door open until the cake is in; then turn on the draft and by the time the oven is at baking temperature, the cake will have risen sufficiently."

For rich, moist, feathery cakes Mrs. Briggs always recommends

K.C. BAKING POWDER

It is double acting and sustains the raise. You can open and close the oven door, turn the tin around in the oven or do anything else necessary, without any danger of making the cake fall.

Try your favorite cake next time with K.C. Baking Powder and see how much higher it will rise. Make it just as you always do, with the same quantity of baking powder. While K.C. is less expensive than the old fashioned baking powders, it has even greater leavening strength and it is guaranteed pure and healthful.
